

Snap-on Introduces Software Bundle 9.2 ***Providing Unbelievable Coverage Bumper-to-Bumper***

LINCOLNSHIRE, IL, April 6, 2009 – Snap-on's new Software Bundle 9.2 supercharges VERUS™, MODIS™, SOLUS PRO™, SOLUS™ and ETHOS™ diagnostic tools. It combines the technician's knowledge with the right information, to give them the power they need to deliver the engine and system performance that their customers expect.

Bundle 9.2 includes significant coverage of new vehicles and expanded coverage of 1996-later models, for the cars that technicians work on most often. Technicians will see new service and repair opportunities with over 4,300 additional vehicle systems, 4,000 more trouble codes and 3,500 new live data parameters. Plus with thousands of additional Troubleshooter tips and time savers, technicians will be more productive than ever before.

"Software Bundle 9.2 is about getting the right information and capabilities in technicians' hands at the right time, to fix the vehicle right the first time," said Bill Bruno, vice president of marketing for Snap-on Diagnostics. "Bundle 9.2 is a powerhouse upgrade that builds on previous releases by merging an even wider range of engine performance diagnostics and adding crucial, in-demand tests for critical computer-controlled systems, offering unbelievable bumper-to-bumper coverage."

With new and enhanced coverage for HVAC, air suspension, expanded EVAP, body systems, brake bleed, enhanced TPMS coverage and more, Bundle 9.2 allows technicians to better service their customers and repair vehicles that they previously couldn't.

Bundle 9.2 delivers nearly 800 new functional tests and bi-directional controls, including relearns that provide OEM-like power to identify a new component to a vehicle's ECM.

Snap-on software is not simply a data update, but a true upgrade to the scan tool. Bundle 9.2 presents VERUS and MODIS customers with over 6,000 new component test procedures, including specific tests, known good waveforms and values for over 334 new models, making targeting and fixing hard-to-solve problems easier than ever.

The great driveability coverage previously released in Bundle 8.4 is included in the Bundle 9.2 upgrade: Transmission Troubleshooter coverage and enhanced time saver tips, functional tests for EVAP, ABS, air suspension, body controls and more. Advanced platform system enhancements for MODIS and SOLUS PRO, including a hotlink button for one-click printing, PID triggering with an audio alarm and ZOOM options, and thousands of additional codes, data, systems, and timesaver tips for 1992-2008 models.

To see all the vehicle platforms and systems covered in Bundle 9.2, ask a Snap-on representative to see the Snap-on vehicle coverage guide or visit the Web site at <http://diagnostics.snapon.com>.
